for the Mankato Marathon medical support team! The bike medical team supports marathon runners by riding on bikes with basic first aid and medical care, providing bandaids, wraps, gels, nutrition, blister creams and more to the runners. Basic medical training and CPR preferred, BUT we do provide free CPR and medical training if needed.

Biking skills needed!

Bike medical team members often put on more than 30 miles on race day. Riders will circulate between aid stations, watching for runners in distress and offering aid as needed. Course assignments will be based on your riding strengths.
